

TECH TALK

An IT social networking web application

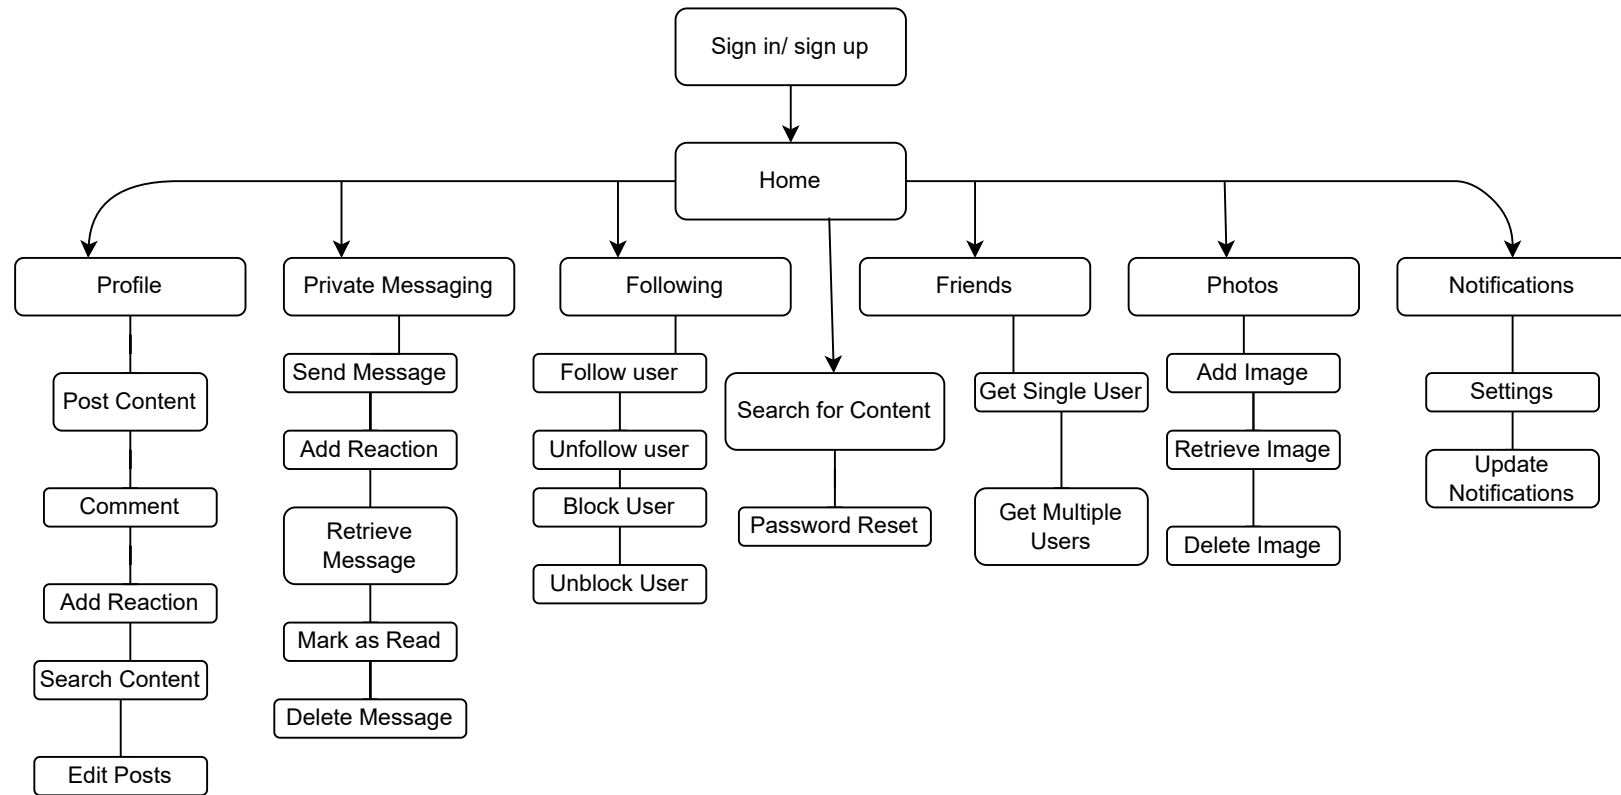

APPLICATION SUMMARY:

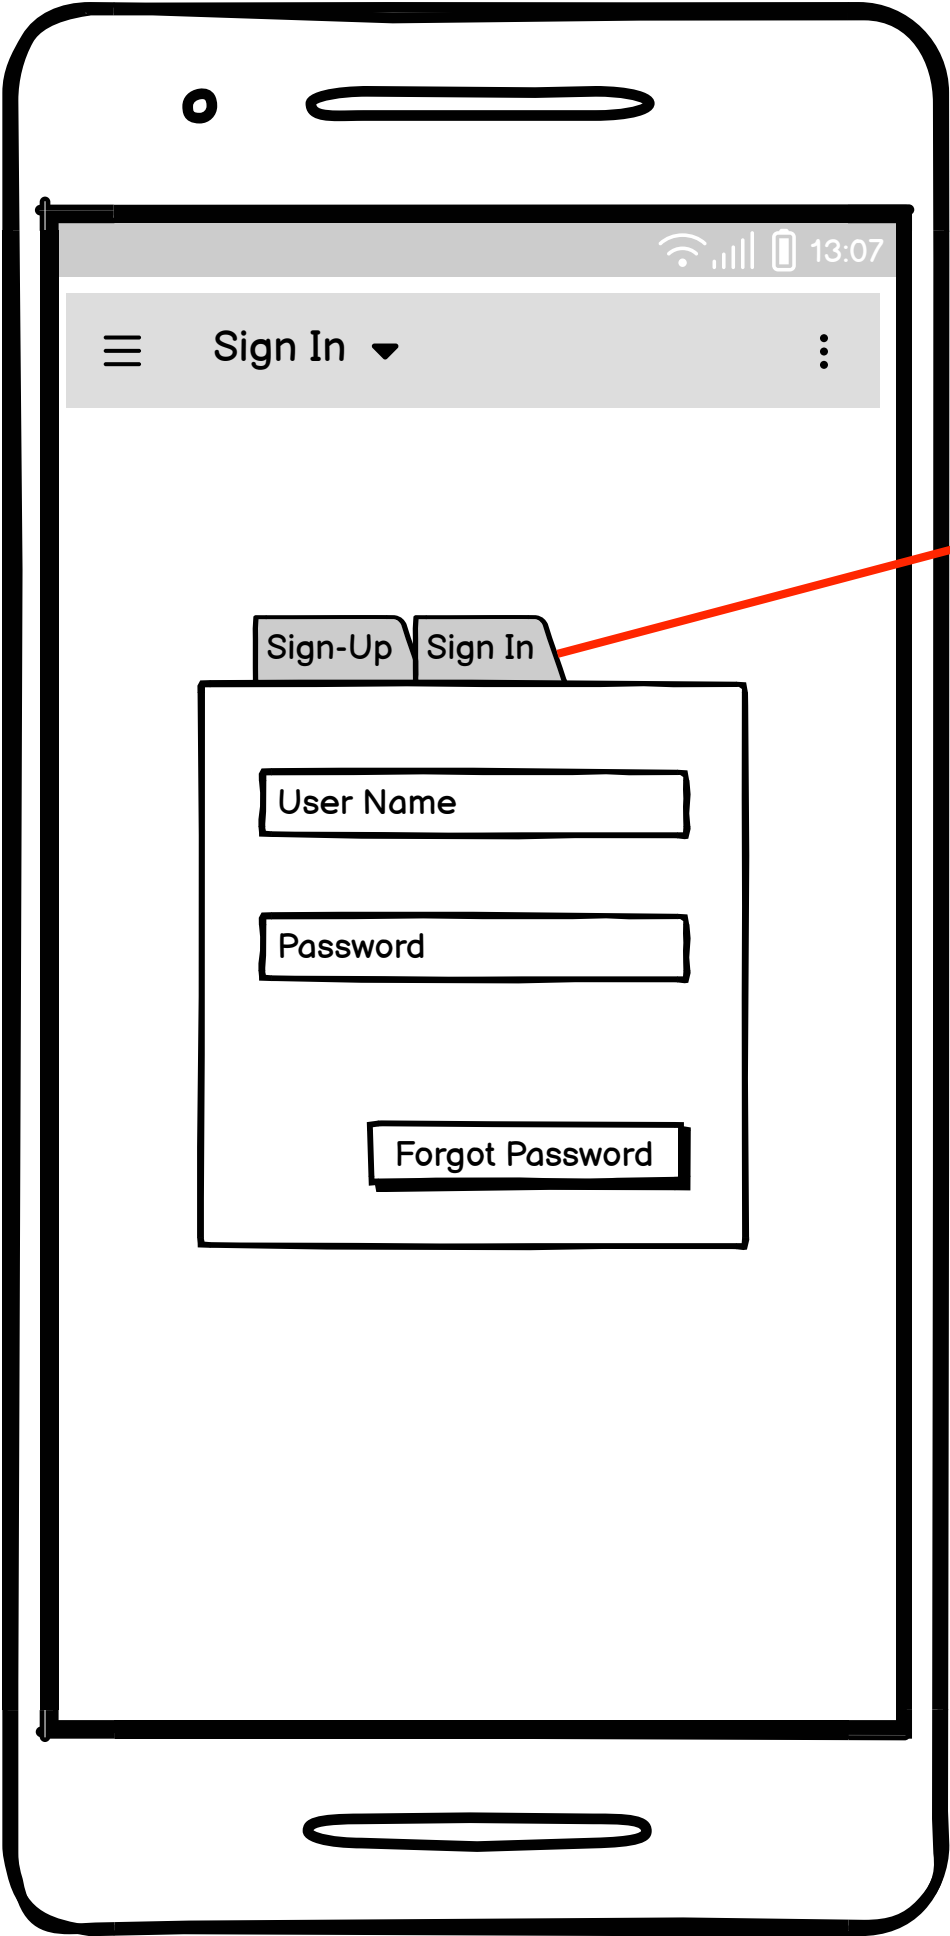

Tech Talk is a social networking web application that aims to create an online platform where technology enthusiasts and professionals can connect, share ideas, and collaborate. The platform will provide features such as discussion forums, live chat, and job postings. Users will be able to create profiles, join groups, and follow other users with similar interests. This platform will help keep both tech experts and enthusiasts up to date on new technologies, create more job opportunities, provide education, and foster innovation in the technology sector.

TO NOTE:

- ⇒ This is not a CRUD application, as it will have a search feature that allows users to search for content of their interest.
- ⇒ Wireframes include all features and MVP features are noted on those wireframes.
- ⇒ Style Guide HTML and CSS documents are attached separately, and a copy of the HTML output is included in this document.

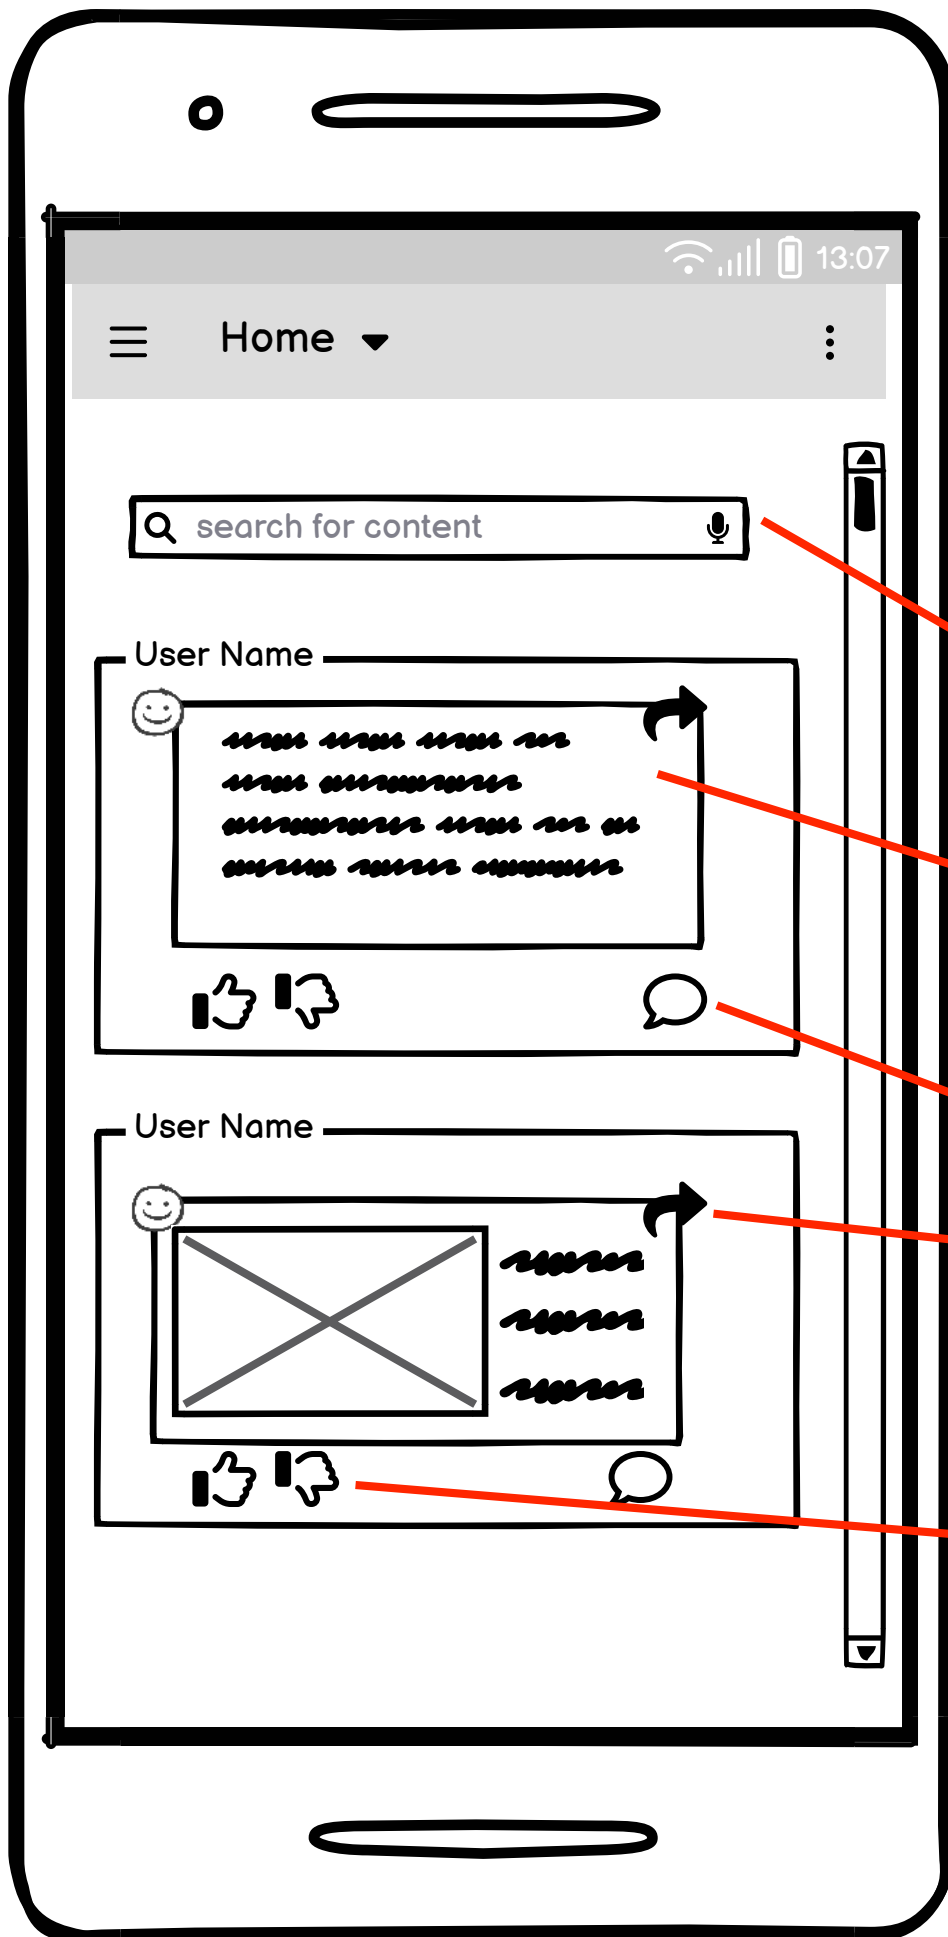

Capstone Storyboard

The sign-up option also asks for the user's email

MVP Feature

This search option allows users to seek out content of their choosing

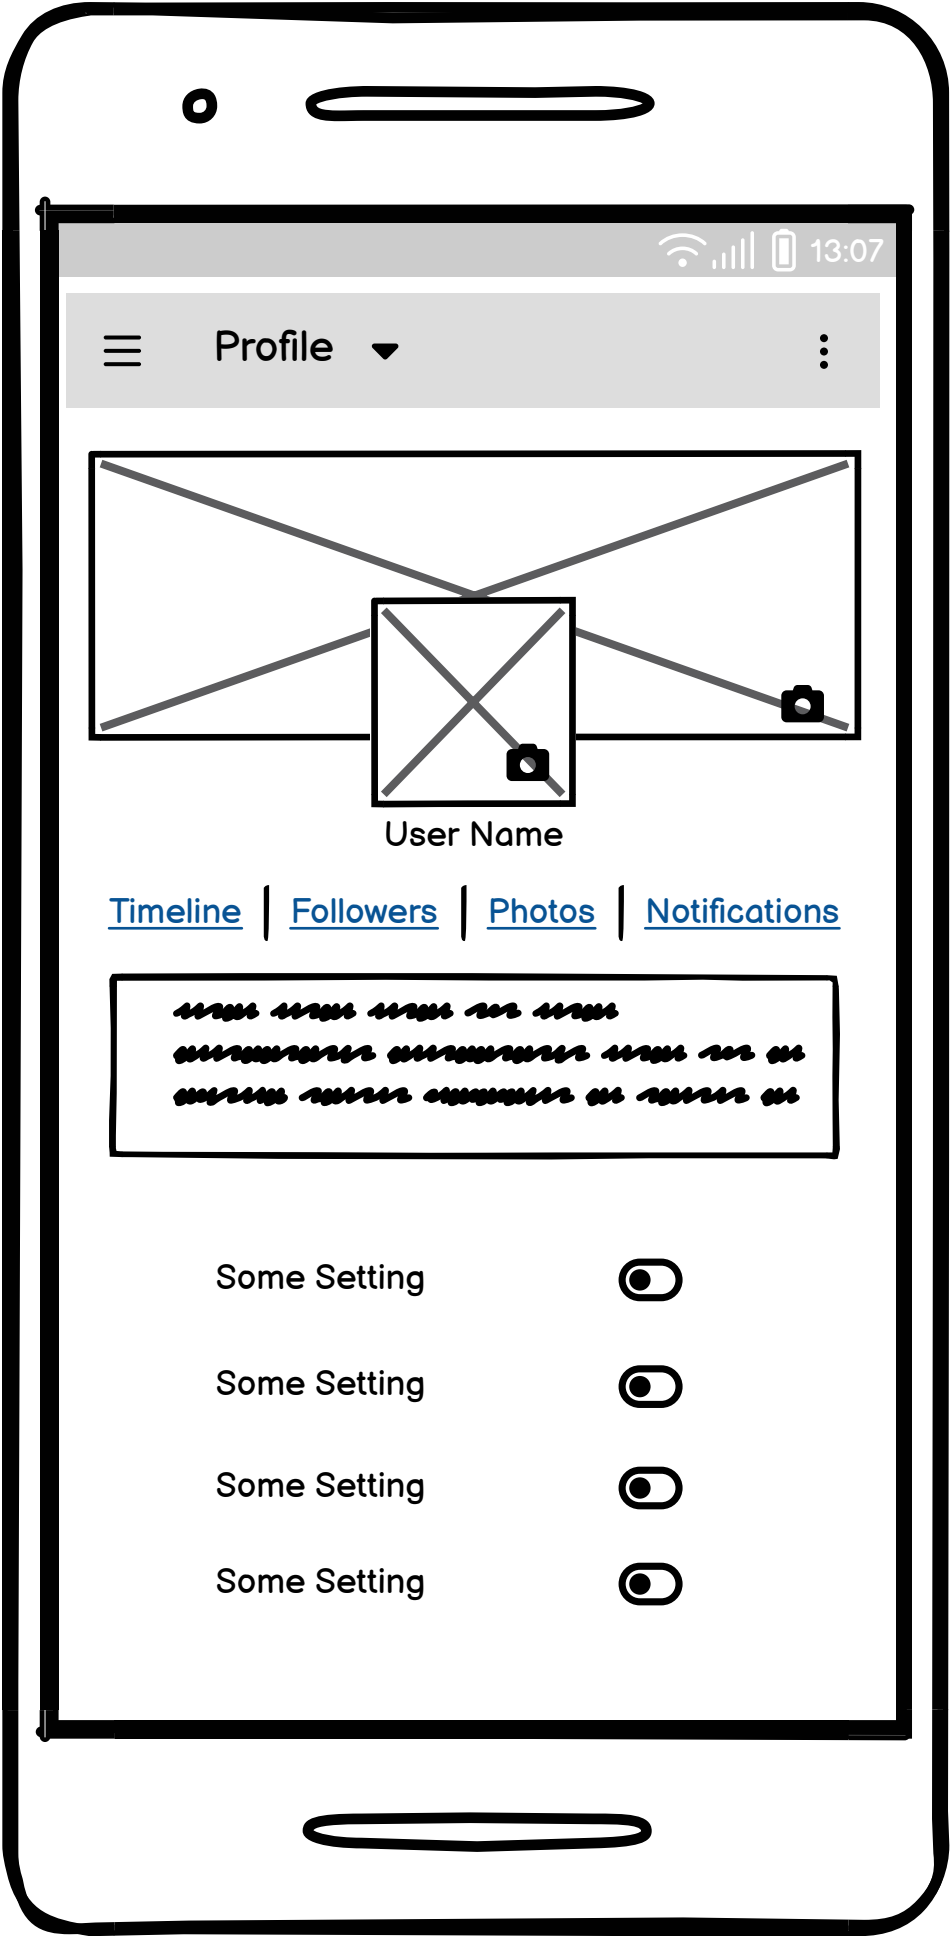

Users are able to post text, pictures, links and gifs.

Users can post comments to posts

Users can share posts via a message or another post

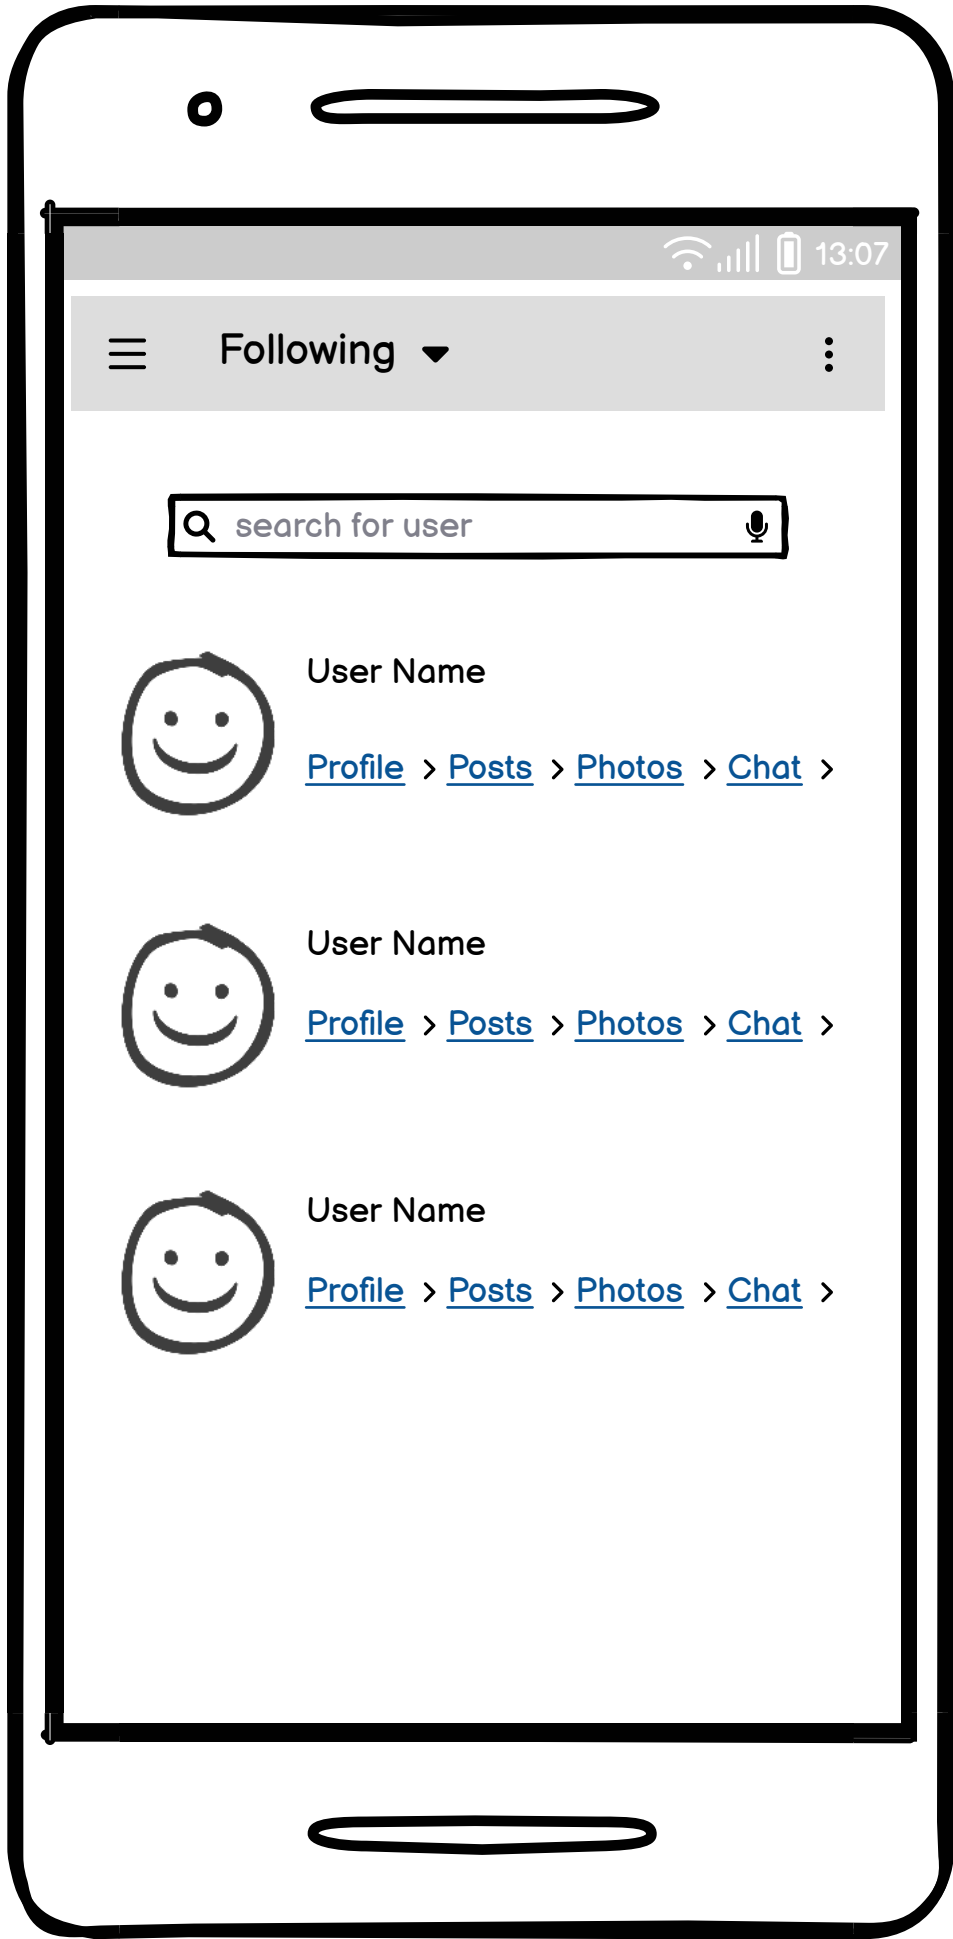

Users can share various reactions to posts

MVP Feature

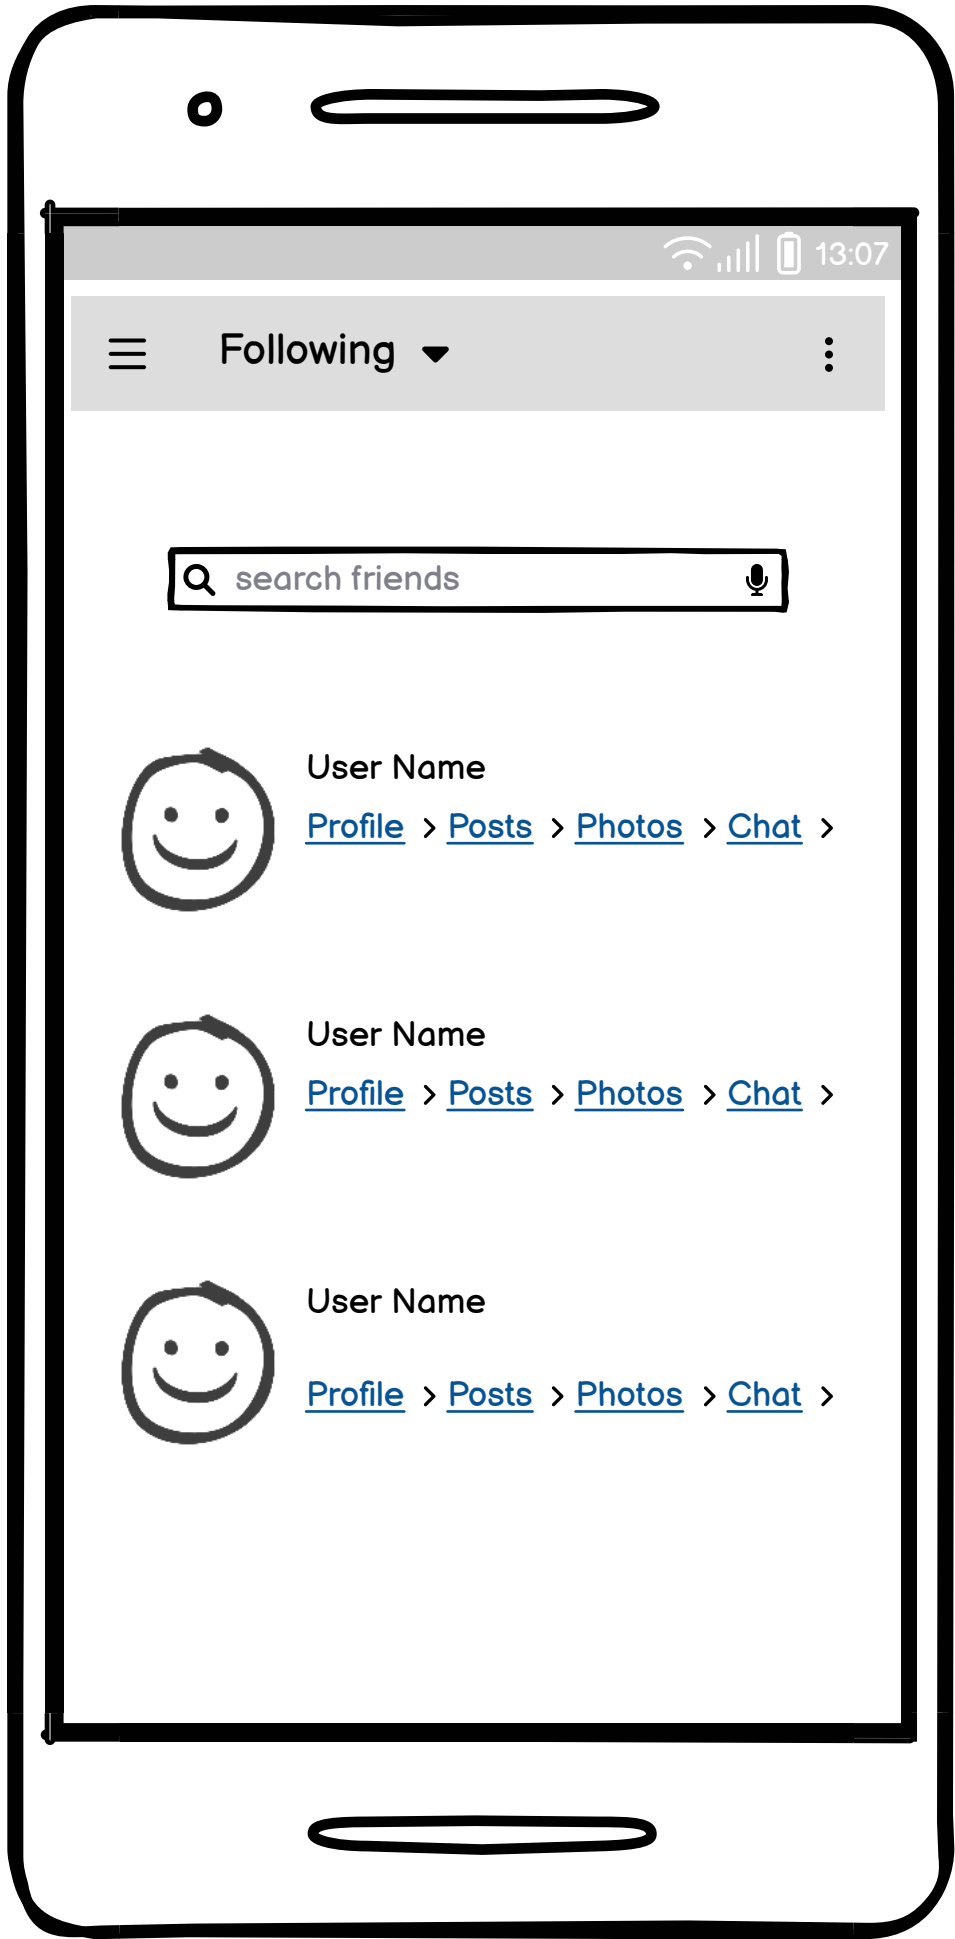

Live messaging feature allows users to chat privately, exchanging pictures or gifs, and reacting to messages.
